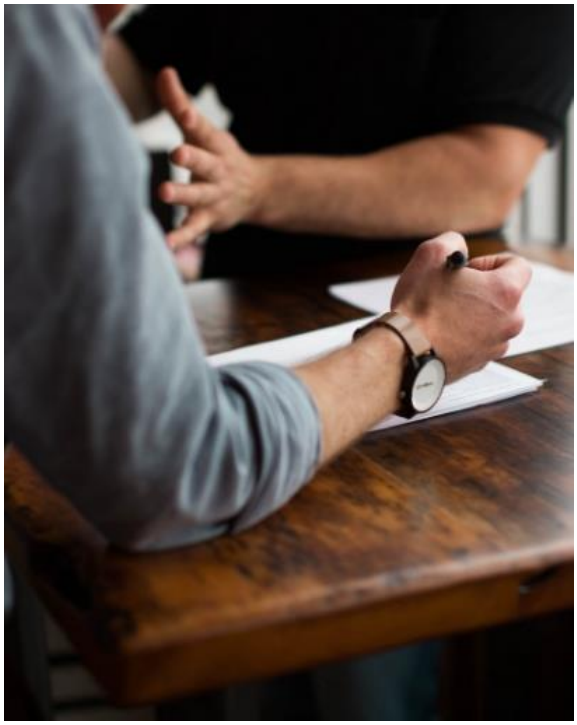
- Ability to self-restore with multiple restore options
- Point in time copy



Get total access, control and protection for your Office 365 Exchange data

If your business uses Microsoft Office 365, chances are your business relies on it on a daily basis for emails, meetings and tasks.

But your Microsoft Office 365 data isn't fully protected, unless you have a smart backup regime in place.

The Plan B Office 365 Exchange Backup can protect and recover your virtual cloud servers data.

Your data is locally hosted in New Zealand, so you know you can recover your Cloud Exchange data locally with minimised recovery time.

With our unlimited storage and retention, you won't have to worry about backup size and your data is retained outside the public cloud for any period of time you choose.

This backup service is delivered using a proven toolset and Plan B's Office 365 Exchange Backup service captures server changes at increments that suit you.

In the event of an Office 365 failure, this will ensure minimised data loss with quick and efficient recovery of your data.

Why do you need it?

So much of your daily business takes place using Microsoft Office 365 tools.

Here are a few reasons why a smart backup plan can save your business valuable time and money.

- Deleted emails are only retained for 14 days in the Deleted Item Retention area and cannot be recovered after this period.
- Disgruntled employees may intentionally delete business critical information.
- Human error – accidental deletions mean data is permanently deleted after 14 to 30 days.
- System and cyber attacks can cause unexpected data damage and loss.
- Legal disputes- can result in penalties for non-compliance with legal obligations.
- Legislation issues -key financial records and business transactions need to be stored that may be required as evidence of information included in financial reports. Not complying with this law results in severe pecuniary or criminal penalties.

Why this solution?

Our backup solution will mean you don't have to panic when a user accidently deletes an email or a file. Save your time and money with our stress-free solutions for Office 365 Exchange Backup.

- Comprehensive protection for Office 365 email, calendars, SharePoint Online and OneDrive for Business.
- Automated and on-demand backups.
- Self –service recovery in seconds using an intuitive user interface.
- Unlimited data retention.
- Industry leading security.
- Point-in-time backup and accurate granular restore.

Key Features

Storage

- Microsoft Office 365 Exchange data located in your Plan B Cloud Repository is stored on enterprise-level SAN storage located locally in New Zealand in our Plan B access controlled data centres.
- Our SAN infrastructure is RAID projected, housed in a temperature controlled environment and protected from mains power surge or failure.
- Each customer cloud repository is isolated from other repositories for security purposes.

Point in time copy

- Plan B can retain a point-in-time backup of your exchange data once a month and write it out to our Object Storage service.
- During the monthly copy process, the backup job will be disabled to ensure the integrity of the data being copied. The backup job will be re-enabled automatically.
- This additional option ensures your data is retrievable for the life of the contract you have with Plan B (up to seven years).

Recovery

There are two recovery options:

Self Recover

- Our backup solution supports customer-initiated restores. Data recovery can be initiated at any time from your Veeam Explorer for Microsoft Exchange console using data stored in your Cloud Repository at Plan B.

Activate Recovery Expertise

- Our Plan B Data Protection team can recover on your behalf. You can activate Recovery Expertise at any time during our business hours by phoning the Plan B Service Delivery Team.
- You can do a Physical Recovery or a Point in time copy.

How does it work?

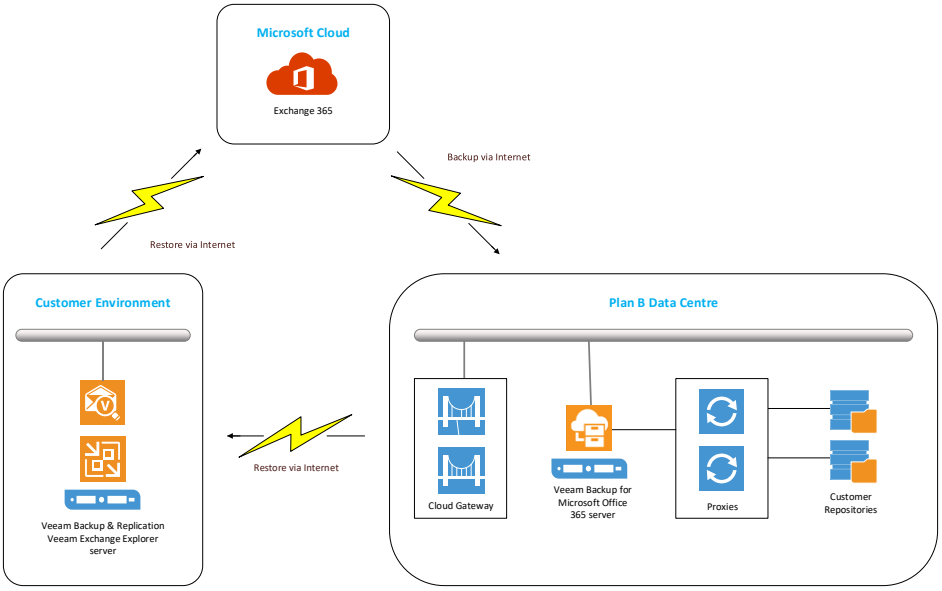
Plan B's Office 365 Exchange Backup is a service that will store your exchange data on infrastructure located in Plan B's data centres.

At set up time you specify the frequency and retention of the data that we will backup.

Plan B will then configure the appropriate jobs and provide enterprise-grade offsite storage with a daily job success or failure check.

The service is designed to be secure, cost-effective, and to minimize the risk of data loss from the Microsoft Cloud.

It provides and enterprise-level solution that can be implemented quickly with the capability for you to self-restore your data.



About the Plan B Group

The Plan B Group has an absolute focus on providing enterprise-grade Cloud Hosting, Data Centres, Networks and Business Continuity services, so that our clients can focus on their real work; building a better business.
